

Primary Health Care

Primary Health Care

The Primary Health Care in Qatar is providing preventive, curative, quality health care, health education and medical management to all categories of ages and cases to maintain high level of wellness to the community using collaborative multidisciplinary approaches and family/patient education.

Introduction

In 1978 Primary Health care (PHC) was recognized and attached to the Ministry of Public Health.

A Main plan was set for their comprehensive services which lead to achieving the social development in the community through a comprehensive health concept (physical, psychological and social wellness). Therefore and in order to achieve such objective, Health centers were established in different areas of the country to make easy access for the citizens.

In accordance with the Emiri decree Law no. 14 dated 18 June 2002 all the Primary health Care centers were annexed to Hamad Medical Corporation.
